Mr. Philip De Tournillon
Current Systems, Inc.
1645 Donlon Street
Suite 104
Ventura, CA 93003

Dear Mr. De Tournillon,

The products listed below are currently Certified to *ANSI/APSP 16 Suction Fittings for Use in Swimming Pools, Wading Pools, Spas, Hot Tubs and Whirlpool Bathtub Appliances*. ANSI/APSP 16 has replaced ASME/ANSI A112.19.8. The current and official NSF Listings can be found at <http://www.nsf.org/>. Relevant information to the Certification such as manufacturing facility, flow rates, etc. are included in the NSF Listings. The NSF Listings should be reviewed for a product's Certification status, application, and parameters.

	Suction Fitting Model	
<u>18" x 23" Suction Outlet Cover</u>	<u>20" x 44" Suction Outlet Cover</u>	<u>Riverflow System</u>
CSI 1823	CSI 2044	RFS 200

ANSI/APSP 16 requires suction fittings be marked with a life expectancy statement. During the Certification, NSF verified the suction fittings included a life expectancy statement. The life expectancy statement indicated "7 years" for all three models, CSI 1823, CSI 2044, and RFS 200.

The standard does not validate or verify that the life expectancy statement is accurate, only that a statement is present. **NSF has not tested or validated the life expectancy statement of any suction fittings.** The life expectancy statement is provided by the manufacturer to the end user for informational purposes. No claims have been made to the accuracy or validity of the life expectancy statement.

If you have any questions as to the Certification status of any products or what the Certification means, please contact me at any time.

Regards,

David Nance
